Definitions 8

Seasonally adjusted refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see definitions on page 8.

Unadjusted figures are available on page 5.

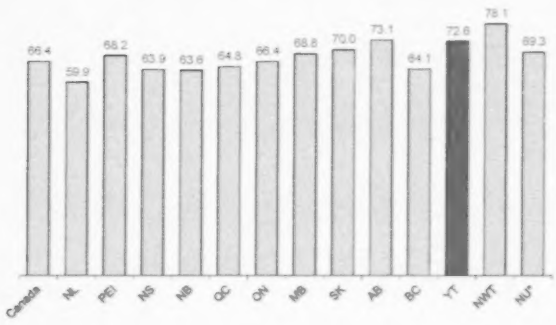
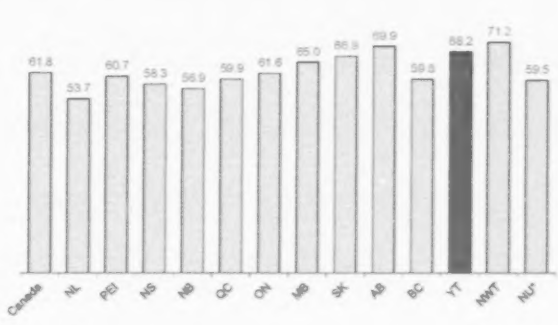
Comparisons with Canada - Snapshot

Participation Rate, September 2013



Employment Rate, September 2013



*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in September 2013 was 72.6%, third-highest in Canada.

Yukon's September employment rate (the percent of the population which is employed), at 68.2%, is the third-highest in Canada.

Comparisons with Canada - Historical

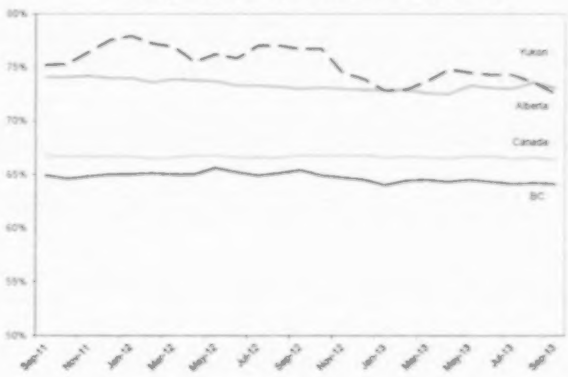
The Labour Force Survey estimates that 72.6% of Yukoners aged 15 and over were employed or were seeking employment in September.

Yukon's participation rate in September (72.6%) is the lowest since July of 2010 (72.3%).

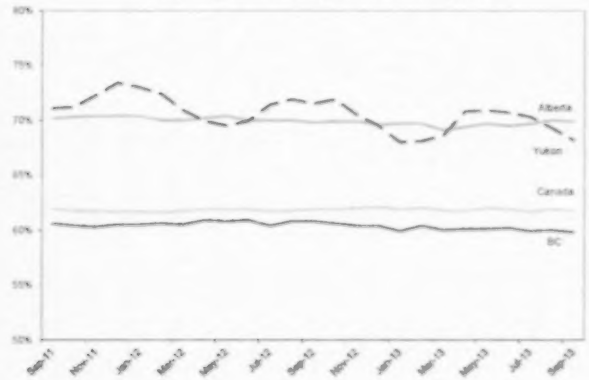
The September 2013 employment rate of 68.2%, is down 1.1 percentage points from August, and down 3.3 percentage points compared to September 2012 (71.5%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

Participation Rate, Sept 2011 - Sept 2013



Employment Rate, Sept 2011 - Sept 2013



Unemployment Rate, Sept 2011 - Sept 2013

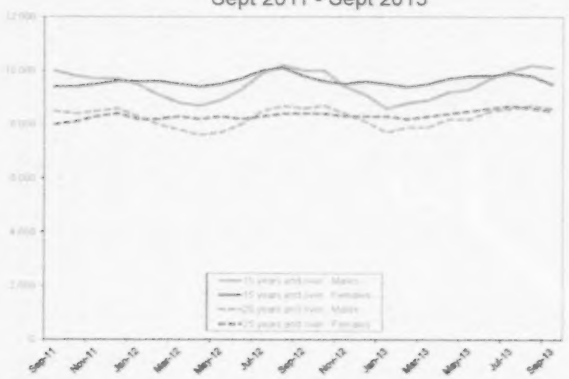
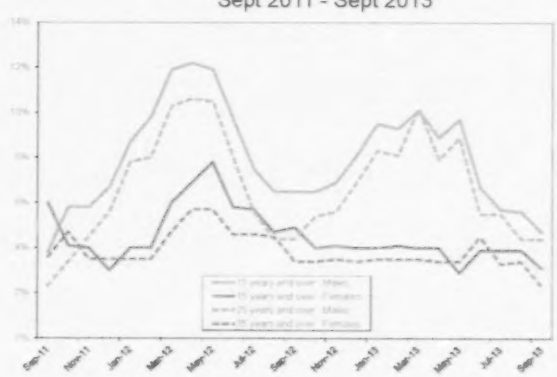
Employment by Age and Sex,
Sept 2011 - Sept 2013



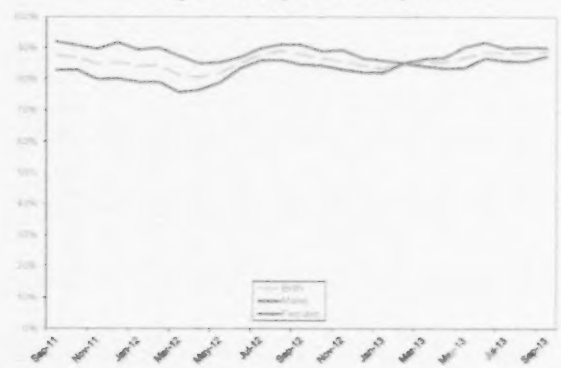
Unemployment Rate by Age and Sex,
Sept 2011 - Sept 2013



- Comparing September 2013 to August 2013, the unemployment rate for males aged 15+ decreased from 5.6% to 4.7% and the rate for males aged 25+ remained unchanged at 4.4%. The rate for females aged 15+ decreased from 3.9% to 3.1%, while for females aged 25+ it decreased from 3.4% to 2.3%.
- Yukon's youth unemployment rate (aged 15-24) has been consistently over 10% since March of 2011, with the exceptions of April (8.0%), June (7.4%) and now September (7.4%) of 2013 .

Employment, *Unadjusted,* by Full-time/Part-time, Sept 2013

Full-time employment as a % of all employment
Age 15+, Sept 2011 - Sept 2013



- 17,400, or 88.8%, of Yukon's workers aged 15+ were employed full-time in September 2013. This was the third-highest among all other jurisdictions.
- Nationally, 81.2% of employed Canadians worked full-time in September.
- 90.1% of employed Yukon males worked full-time, while 87.4% of females did.
- When comparing September 2013 to August 2013, full-time employment decreased by 300.

Employment, *Unadjusted*, by Industry, Sept 2013

	Both sexes	Males	Females
Total employed	19,600	10,100	9,500
Goods-producing sector	2,900	2,600	300
Forestry, fishing, mining, oil and gas	600	500	x
Construction	1,700	1,600	x
Services-producing sector	16,700	7,500	9,100
Trade	2,100	1,200	900
Transportation and warehousing	800	700	200
Finance, insurance, real estate and leasing	700	300	400
Professional, scientific and technical services	1,200	500	700
Business, building and other support services	600	400	200
Educational services	1,200	400	900
Health care and social assistance	2,500	400	2,000
Information, culture and recreation	1,100	600	500
Accommodation and food services	1,200	700	500
Other services	600	400	200
Public administration	4,500	2,000	2,500

x = suppressed for confidentiality
Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

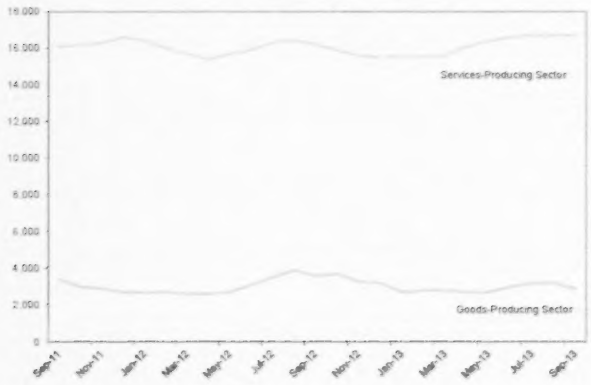
- In September 2013, 16,700, or 85.2% of working Yukoners were employed in the services-producing sector; 2,900, or 14.8% were employed in the goods-producing sector.
- 58.6% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 54.5% of workers in Yukon's services-producing sector, only 10.3% of goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, Sept 2011 - Sept 2013



- In September 2013, employment in the the goods-producing sector (2,900) decreased by 300 compared to August 2013. Employment in the services-producing sector remained at a record high level for the third consecutive month at 16,700.
- Comparing September 2013 to September 2012, employment in the goods-producing sector decreased by 700, or 19.4%, while employment in the services-producing sector increased by 500, or 3.1%.

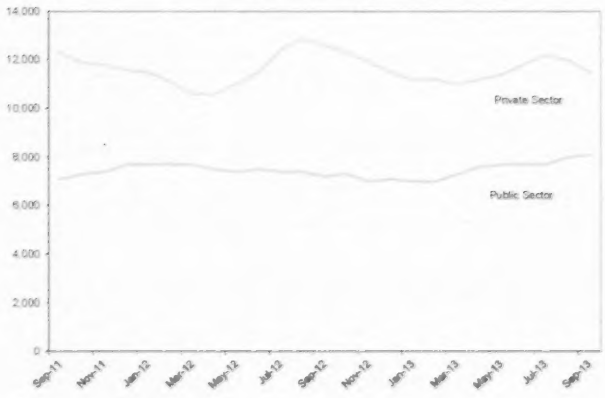
Public and Private Sectors, *Unadjusted*, Sept 2013

	Both sexes	Males	Females
Total Employed	19,600	10,100	9,500
Public employees	8,100	3,400	4,700
Total private sector	11,500	6,700	4,800
Private employees	8,400	4,600	3,800
Self-employed	3,100	2,100	1,000

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In September 2013, 41.3% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 27.0% were self-employed.
- Private sector employment was down by 1,100, or 8.7%, from September 2012, while public sector employment increased by 900, or 12.5%.

Public/Private Sector Employment, Sept 2011 - Sept 2013



Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as "employment/population ratio," it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April's unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories' figures are not included in the calculation of Canada's numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
